

Piip

Free Mobile &
Web Messenger

UI Designer

Company Profile

Drey Corporation is a fresh and dynamic IT company headquartered in Zürich, Switzerland. We develop innovative products in the area of Business Software as a Service and Mobile Applications. For our Belgrade Branch, we are seeking a motivated and skilled User Interface Designer to be involved in our fast growing, wide market, state-of-the-art technology based Piip Messenger application.

Duties and Responsibilities

- Responsible for design of front end designs, GUIs for our web and mobile products and services
- Responsible for testing the design in terms of usability, consistency, cross-platform performance etc. and perform UI quality assurance
- Design approach based on simplicity, with eye for aesthetics and attention to details
- Liaising with the marketing team and design with strong customer perspective
- Strong cooperation with development teams

Requirements

- University Degree (design, art, computer science, engineering or equivalent)
- Very good knowledge of HTML, CSS and JavaScript
- Very good knowledge of Photoshop, Illustrator and related tools
- In-depth knowledge of UI design principles like user-friendliness, accessibility, standards and current trends and techniques, software usability and user interaction principles
- Passion for performance, excellent organisation and motivation to go the extra mile
- Flexible attitude, ability to perform under pressure and take responsibility
- Portfolio of successfully completed UI design projects
- Minimum 2 year experience with interface design
- Proficient in English, both spoken and written

Benefits

- Opportunity to be part of a new assembled team in a dynamic working environment
- Attractive career opportunities in a fast growing company

Application

If you think you are the perfect match for us, we're looking forward to hearing from you! To enter the competition, we would like to see a proposal from you, how the Web Messenger part of Piip could look like after a complete redesign of you. To see, touch and feel the current Web Messenger, download and register with Piip as instructed on piip.com and sign up for the Web Messenger. Additional to your competitive work, please send your CV and your portfolio of your UI design work as one pdf file to our recruiting desk.
