

Study Manager – based in Belgrade, reference no. BEL0004S

Rio Tinto is a leading international mining group headquartered in the UK. Rio Tinto's business is in finding, mining and processing mineral resources. Major products include aluminium, copper, diamonds, energy (coal and uranium), gold, industrial minerals (borax, titanium dioxide, salt) and iron ore.

Jadar Project is a pre-feasibility stage lithium and borates project with significant economic potential. The Jadar deposit contains the largest known lithium resource in Europe and is the world's only known lithium borates resource. A new process has been developed to convert Jadarite ore into technical grade Boric Acid and both technical and battery grade lithium carbonate. The project is located in the Jadar basin approximately 100km from Belgrade, Serbia.

The Role:

The Study Manager will be accountable for:

- Providing key engineering input to the Project General Manager and senior project reports on engineering and equipment standards
- Ensuring consistent application of engineering standards and good engineering process across the project within the constraints of budget and schedule
- Establishing direction and plan for engineering delivery including continuous improvement and engagement of owners group
- Maintaining the involvement of the Operational Readiness Team in the design process and assisting them with technically related requirements
- Developing and executing the engineering management tools
- Setting up and monitoring the controls around engineering delivery in order to meet the project objectives.

A successful candidate will be able to demonstrate:

- Relevant Engineering degree or it's equivalent
- Project Management and Engineering Management qualifications are desirable
- Membership of a recognized professional Engineering body and PMI PMP certification
- would be highly advantageous
- License to practice engineering within a jurisdiction
- Previous experience in an engineering role with some work on site in mining and plant operations (potentially in construction)
- Good knowledge of safety systems plant legislation
- Experience in leading a large engineering team
- Excellent English language skills.

Short listing will begin immediately but the position will remain open until filled. Qualified candidates should apply online at www.riotinto.com/careers or by clicking on the link:
